Contextual Model

**Climate Change**
- Gradual Change in Temperature and/or Precipitation

**Social and Economic Drivers**
- Economic Development
- Pollution / Environmental Degradation
- Livelihood Insecurity

**Environmental Change**
- Increased Water Scarcity

**Intermediary Mechanisms**
- Anti-State Grievances
- Grievances between Societal Groups

**Fragility and Conflict Risks**
- Water-stressed Area
- Biodiversity, Agricultural / Pastoral Land, Water

Context Factors
