Farmer-Herder Conflict between Fulani and Zarma in Niger

Contextual Model

Social and Economic Drivers
- Economic Development
- Change in Access / Availability of Natural Resources
- Grievances between Societal Groups
- Displacements / Migration
- Natural Resource Scarcity
- More Frequent / Intense Extreme Weather Events
- Gradual Change in Temperature and/or Precipitation

Context Factors
- Agricultural / Pastoral Land, Water
- Eroded Social Contract
- Food Insecurity
- Low Level of Economic Development
- Insecure Land Tenure
- Water-stressed Area
